FOREWORD

For the past sixteen years, the educational characteristics in this document have been presented in essentially the same format to allow comparisons over time. Each issue has been modified to include additional characteristics as new data become available. Therefore, comparisons will vary in the number of years for which data are presented. Such comparisons will yield changes in descriptive trends for districts as well as for the State.

The 1986 edition contains 109 ranked characteristics that are arranged alphabetically, by district name, and numerically, by characteristic value. In some instances, a high value may be favorable; in others, it may be unfavorable. Users should give attention to the sources that are supplied in the Footnote Listing at the end of the tables as well as the Explanatory Notes at the beginning of this document. This information is supplied to further clarify the characteristics of interest.

We urge you to use the enclosed information with caution. High, low or median values for the characteristics presented in the tables are not intended to measure the quality of education in any school district. Many other factors must be taken into consideration when determining quality education. This updated information may be useful to you in preparing local profiles, public information brochures, and other such sources of information.

For the past twelve years, the Office of Research, Management Information Section, has provided District Profiles based on the school district characteristics found in this document. These profiles will be available again upon request.

We continue to desire your comments as to how you use the information within this publication and its importance to you. Your recommendations for change as well as any questions concerning the content of the publication are invited and encouraged.

EXPLANATORY NOTES

The 1986 edition of RANKINGS presents 109 tables of ranked characteristics related to public education in South Carolina. The characteristics are arranged alphabetically by school district name and numerically by characteristic value. In some instances, a high value may be favorable; in others, it may be unfavorable.

Statistics for Felton Laboratory School, South Carolina Youth Services District, Palmetto Unified District, and South Carolina School for the Deaf and Blind were excluded from all tables except Tables 64-68 which rank average years of experience of the various staff categories. The reporting method used in the source documents for these tables did not allow such exclusions.

State totals presented for tables in this publication may not equal the sum of district/county figures, or may not be exactly the same as listed in the source document, due to rounding procedures.

Population

This current edition contains three new tables of population data recently released by the Census Bureau. Table 6 presents data by four age groups based on 1980 population and ranks the percent of population 5 to 17 years old; this table replaces Table 6 of the 1985 edition. Table 16 ranks the percent of population 18 years old or over with their own children who are 6 to 17 years of age. Table 17 ranks the percent of population 18 years old or over with less than a 5th grade education.

Economic

Tables relating to employment in various categories (Tables 28-34) display estimates of nonagricultural wage and salary employment by the county in which the work was performed, rather than by the county in which the workers resided. This reporting was consistent with the reporting in previous editions. The State figures may not equal the sum of county figures in the employment tables due to rounding procedures and inability to allocate some workers in the South Carolina totals to specific counties.

In order to maintain the confidential nature of data reported by employers, information was not shown in the source document for industries with fewer than three reporting units or when any firm, or two firms combined, accounted for 80 percent or more of employment in the industry.

As in the past nine editions, the labor force statistics used to calculate unemployment percentages (Table 26) were reported on a residence basis rather than by place of work and were based on an annual benchmark derived from the Current Population Survey Benchmark.

Table 27 gives the 1984 average weekly wage of workers covered in employment. The data reported in the source document were based on employment and payroll information reported by employers to the Unemployment Compensation Division of the South Carolina Employment Security Commission on their regular quarterly tax report.

Pupil

The official pupil count for 1973-74 through 1977-78 was the 135-day cumulative enrollment at the end of the 180-day reporting period. Thereafter, the official pupil count has been the Average Daily Membership (ADM) at the end of the 135-day accounting period. Unless otherwise noted, kindergarten has been included in membership. Tables 41-46 present enrollment figures rather than ADM figures to allow certain comparisons.

Professional Staff

Unless otherwise stated, statistics for personnel in special education schools were included in tables relating to professional staff. Personnel in multidistrict organizations were not included in the various staff tables due to the impracticality of allocating such staff to individual districts. See Appendix D for a definition of staff included in the various tables.

Financial

The financial tables include expenditures and revenues for area vocational centers and county boards. The area vocational center monies were prorated among the districts on the basis of the number of pupils attending the centers (See Appendix A). The county board monies were prorated on the basis of ADM for the respective districts (See Appendix B).

The pupil counts used in the computation of expenditures and revenues per pupil were the average daily memberships for the 135-day reporting period. Kindergarten pupils were counted as half-day pupils.

Total expenditures for general operating purposes reported in this publication (Tables 83, 99, and 100) include the totals for General Administration, Instructional Services, Plant Operation and Maintenance, and Auxiliary Services. The above expenditures are referred to as current operating expenditures. Expenditures for Capital Outlay and Debt Retirement (Tables 105 and 106) are not included in the tables reflecting current operating expenditures. Adult Programs, Community Services, and Pupil Activity are among the categories included in Auxiliary Services. See Appendix C for a complete listing of School District Audit accounts used in the computation of revenues and expenditures.
